

## Health workers in Córdoba develop an innovative system for ambulances 2.0

LOCATION: Córdoba

DURATION: 1'40"

**SUMMARY:** Two health workers from Córdoba have developed a system that permits emergency physicians having access to the medical records of patient while they arrive to the hospital by ambulance. This way they minimize the risk or error, knowing the medication they are taking, if they have any allergy... In case they try to give the patient drugs which aren't suitable for him, the system emits an alert. All the ambulances of the Andalusian health system are equipped with these innovative tablets.

### VTR

**Ambience:** Data allocation. Go to Pintor Espinosa Street number 6, province of Córdoba. Data of the patient. Women. Aged 28 years old. Name María.

They know the name of the patient before arriving, and through this tablet they have access to his medical record.

**FERNANDO LARA**  
Emergency doctor

*"We can know his history, the medication he is taking, his contraindications, allergies..."*

Data that increase security in emergency cases and that minimize the risk of mistakes.

**FERNANDO LARA**  
Emergency doctor

*"In case we don't know the medication he is taking or the diseases that affect him."*

**RAFAEL MUÑOZ**  
Emergency nurse

*"If we use any drug and we intend to use another which is contraindicated, the system is going to warn you."*

They are 2.0 ambulances. New technologies applied to emergencies in the Andalusian health system that facilitate the work of professionals when they assist patients at home or in the street.

**FERNANDO LARA**  
Emergency doctor

*"Even if they are in the street, they usually carry their ID and we can consult it, even if the patient is unconscious."*

This tool is the product of the idea of two health workers from Córdoba, Fernando y Rafael.

**RAFAEL MUÑOZ**  
Emergency nurse

*"This was started a long ago, 12 or 15 years."*

**FERNANDO LARA**  
Emergency doctor

*"We had to install pcs in ambulances and that was much more complicated."*

And when technology arrived, their tool was born. Tablets which are already installed in all the Andalusian mobile-ICUs.
