

Printing toys in 3D so no child is left without a toy in Christmas

LOCATION: Granada

DURATION: 1'23"

SUMMARY: 'Imprimiendo sonrisas' (or 'Printing Smiles') is a campaign in which the 3D printing co-working Createc 3D is participating. The goal of this campaign is printing and gathering 3D printed toys to deliver them to associations that help children in need so no child is left without a toy this Christmas.

VTR:

A small spinning top or a play. These are some of the toys that are arriving to this 3d printing workshop in Granada. Thanks to the 'Printing smiles' campaign, they are gathering these toys to give them to children in need.

JOSÉ MARÍA TORRALBA
Createc 3D

"People can print the toys in their own laboratory or at home; it is a cheap way to help. Then, we take it to the laboratory, where they contact associations or schools that need them."

FRANCISCO JAVIER MENDOZA
Createc 3D

"Downloading a file or designing it, and sending it to us so we can distribute it among the associations that help children in need."

They print their own pieces but they also collect toys from other people. Diego is a teacher who collaborates with them.

DIEGO GARCÍA
Donator

"Our school decided to join the initiative printing some toys. Some of them were suggested by them and we looked for others in repositories."

SOS Children's Villages helps them to give the toys to children.

JUAN MANUEL SÁNCHEZ
SOS Children's Villages

"It is a great help for SOS Villages. To make it a reality so children can fulfil their dreams."

JOSÉ MARÍA TORRALBA
Createc 3D

"It doesn't cost money and it is satisfying for both you and the child, because it is a very generous way to collaborate."

So no child is left without a toy or a smile this Christmas.
