

DomoElectra, a videogame for learning about home repairs from a YouTuber

LOCATION: Granada

DURATION: 1'28"

SUMMARY: An online game for repairing sockets or installing antennas. It is the latest resource that the Grenadian Manuel Amate, together with his colleagues at DomoElectra, has created in order to share his technical expertise. This new site, is linked to his YouTube channel, which has more than ten million hits.

VTR:

A game about electricity. The Grenadian Manuel Amate is the main character in this graphic adventure, as he guides the player through the ins and outs of domestic repairs.

"All the stuff that they don't teach in the books, they can do in the game so they learn whilst playing and having fun."

Manuel Amate
DomoElectra

With more than four thousand downloads, the game is another tool for being able to share his knowledge with others.

MANUEL AMATE
DomoElectra

"Teaching them a few skills and that they learn about our work, and that they learn how to repair sockets and install antennas."

MARCOS ALONSO PÉREZ
DomoElectra

"How plumbing works or home electric installations, fuse boxes, or meter readings. It's a way of making it accessible to more people, as everyone should have a basic understanding."

As well as the videogame, Manuel is a well-known YouTuber thanks to his videos that he creates and shares while working with his colleagues. Some videos are even used in vocational training classes throughout Spain.

BACKGROUND

"Thank you for joining me for these easy, short and fun video tutorials that we make for you, and for this incredible YouTube community."

MANUEL AMATE
DomoElectra

"Not only that they learn at that moment, but also everyone, anyone that sees it. In fact, even in some vocational classes, teachers, students, etc use these videos during their training period."

These videos have passed ten million YouTube hits, and his channel now has around seventy thousand subscribers.
