

Zfiles Infection, interactive fiction in your phone that unites comic books and videogames

LOCATION: Granada

DURATION: 1'27"

SUMMARY: Zfiles Infection, is a fusion between videogames, texts and comic books, and the project of Greyman Studios, based in Granada. It offers a new way of reading and playing, as the story unfolds depending on the users' decisions.

VTR:

Depending on the decision you make, the story will unfold differently. This is the interpretation of the classic young-adults novels of the eighties, 'Chose your own adventure', made by Grenadian Greyman Studios. Zfiles Infection is their proposal, a mixture of comic books and videogames, in which the player decides the future of the characters.

CLAUDIO HERNÁNDEZ

Greyman Studios

"An interactive comic book that includes what we all remember about the 80's or 90's, the 'Choose your own adventure' books, and that is brought to this new digital platform."

JOSÉ ANTONIO CHACÓN

Greyman Studios

"We are trying to introduce the interactive fiction concept. An interactive comic book based on these dynamics and, at the same time, we want to add roll game components, this means, fights, dices, statistics..."

A new way to turn a comic book into a game and vice versa, and put it into a cell phone or a tablet.

JOSÉ ANTONIO CHACÓN

Greyman Studios

"They will have to decide in some situations, in others they will have to make an action, and depending on the value of the player, strength or energy, he or she will need to get certain numbers on the dices."

This story about zombies is set in the eighties.

CLAUDIO HERNÁNDEZ

Greyman Studios

"I think that the aesthetic choice we have taken for this fits perfectly, based on American action movies from the eighties."

Thanks to a crowdfunding campaign this Granadian studio will develop this project, where the story is told by the player.
